SOLUTIONS FOR SERVER ROOMS AND CABLING INSTALLATIONS

CONTEG

Solutions for Server Rooms and Cabling Installations

We offer a wide range of solutions for IT, from free-standing racks and wall-mounted cabinets, cooling and ventilation, monitoring and security to cable management and power supply.

Free-Standing Racks

The iSEVEN RI7 rack has been designed to provide the user with an unmatched balance between price, utility and quality. The 19" iSEVEN RI7 rack fully meets the requirements for safe storage of active components, cabling, ventilation and power supply of installed equipment and is ideal choice for installers and end-users who want to spend less time on choosing between various options.

Main Benefits

- Universal rack for standard daily IT use
- Pre-configured rack, with many other options
- Optional perforated door—perforation rate 86 %
- Available in 39 dimensions
- High load capacity

Wall-Mount and SOHO Cabinets

Thanks to their small size, wall-mount and SOHO cabinets are suitable for small offices and homes. We offer cabinets with enough room to access equipment through the front door and the rear side. Some cabinets in this line come equipped with removable side panels with locks. In our product portfolio, you will also find CONTEG racks that can be installed directly into the wall, which makes them a very aesthetic solution for home networks.

Selected Accessories

Ventilation Units and Fans

Ventilation units and fans are used to improve the cooling of equipment installed in the rack. Ventilation units are mounted either on 19" vertical extrusions (horizontally) or on the top or bottom frame of the rack (connecting kit required). Units with 2 to 9 fans are available.

Cable Management

Proper cable management organization is an integral part of any rack installation. Wire management panels with plastic brackets are used for storage and horizontal management of cables in the rack. They are attached to the 19" extrusions.

Storage Systems

Storage systems are used for storing devices inside the rack. We offer a wide range of accessories for products in our portfolio, including fixed shelves, pull-out shelves, drawers and holders and supporting rails and adapters.

Power Distribution Units (PDUs)

The basic power units (PDUs) are used for power supply and its distribution to individual IT equipment in the racks. Basic PDUs can be installed into the rack either horizontally on 19" and 10" extrusions or vertically.

Assembly and Joining Kits

Our wide range of accessories also includes assembly and joining kits.
